Rediscovering the Wisdom

of the Corinthians Timothy A. Brookins, 2024-03-05 A bold new reading of 1 Corinthians in light of Greco Roman philosophy The First Letter to the Corinthians begins with Paul admonishing his addressees over their internal division and reliance on human wisdom But what exactly occasioned Paul s warning Many New Testament scholars have asserted that Paul disapproved of the Corinthians infatuation with rhetoric Yet careful exegesis of the epistle problematizes this consensus Timothy A Brookins unsettles common assumptions about the Corinthian conflict in this innovative monograph His close reading of 1 Corinthians 1 4 presents evidence that the Corinthian problem had roots in Stoicism The wisdom that Paul deprecates is not sophistry he argues but a Stoic inspired understanding of natural hierarchy in which the wise put themselves above believers they considered spiritually underdeveloped In effect Paul s followers saw themselves as a philosophical school in rivalry with other Christians engendering divisions in the church Combining scriptural exegesis and investigation of Greco Roman philosophical culture Brookins reconstructs the social sphere of Corinth that Paul addresses in his letter His skillful analysis provides much needed clarity on the context of a major epistle and on Pauline theology more broadly

Beyond the Individual Will Johncock, 2023-02-03 Do you believe you think independently Do you alone control your actions Stoic philosophy asserts that your mind thoughts and actions are traces of a world which shapes you and everyone else together Our personal nature is part of a system not independent This book studies how a Stoic thinks and acts as part of a community and in service of a world rather than separately or for themselves alone This is not just another book about Stoic philosophy Stoicism has been popularized as a way to primarily serve personal benefits promising mental resilience in an uncontrollable world of people and events This book instead explores how for the Stoics we only benefit personally by being aware of how we are entangled with our fellow humans and the world This perspective reveals anti individualistic conditions for the well being that individuals seek from the philosophy By studying features that might seem to define us as separate individuals our mind body self preserving instinct knowledge and happiness we find that everything about each of us is interconnected and shared The theoretical analysis suitable for general and academic readers involves all ancient Stoic eras comparisons with pre Socratic Platonic and Aristotelian positions and modern Stoic debates

Spiritual Exercises and Early Modern Philosophy Simone D'Agostino, 2023-09-20 In his renowned collection *Philosophy as a Way of Life* Pierre Hadot suggests that the original aspect of philosophy as a method by which one exercises oneself to achieve a new way of living and seeing the world fails with the rise of modernity In that period philosophy becomes increasingly theoretical tending toward a system However Hadot himself glimpses at the dawn of modernity some instances of the original aspect of philosophy still very much present and in his wake Michel Foucault warns that between the late 16th and early 17th centuries the philosophical question of the reform of the mind attests to a still very close link between asceticism and access to truth This book aims to develop just such an idea by thoroughly analyzing the most representative works of the reform of the mind in the early modern period Francis Bacon s *New Organon* 1620 Ren Descartes *Discourse on the Method*

1637 and Baruch Spinoza's Treatise on the Emendation of the Intellect 1677 From this analysis it will emerge that these modern works fully deserve to be counted among the tradition of philosophy as way of life On closer inspection the inquiries about method elaborated in these works are fully understandable only when read in the light of a broader and more complex philosophical need to establish the spiritual conditions for accessing truth and aspiring to full self realization

The Routledge Handbook of Evolution and Philosophy Richard Joyce, 2017-08-16 In recent years the relation between contemporary academic philosophy and evolutionary theory has become ever more active multifaceted and productive The connection is a bustling two way street In one direction philosophers of biology make significant contributions to theoretical discussions about the nature of evolution such as What is a species What is reproductive fitness Does selection operate primarily on genes and What is an evolutionary function In the other direction a broader group of philosophers appeal to Darwinian selection in an attempt to illuminate traditional philosophical puzzles such as How could a brain state have representational content Are moral judgments justified Why do we enjoy fiction and Are humans invariably selfish In grappling with these questions this interdisciplinary collection includes cutting edge examples from both directions of traffic The thirty contributions written exclusively for this volume are divided into six sections The Nature of Selection Evolution and Information Human Nature Evolution and Mind Evolution and Ethics and Evolution Aesthetics and Art Many of the contributing philosophers and psychologists are international leaders in their fields

Dennis, 2020-09-14 Does a flourishing life involve pursuing passionate attachments? Can we choose what these passionate attachments will be? This book offers an original theory of how we can actively cultivate our passionate attachments. The author argues that not only do we have reason to view passionate attachments as susceptible to growth, change and improvement, but we should view these entities as amenable to self-cultivation. He uses Pierre Hadot's and Michel Foucault's accounts of Hellenistic self-cultivation as vital conceptual tools to formulate a theory of cultivating our passionate attachments. First, their accounts offer the conceptual resources for a philosophical theory of how we can cultivate our passionate attachments. Second, the exercises of self-cultivation they focus on allow us to outline a practical method through which we can cultivate our passionate character. Doing this brings out a significantly new dimension to the role of the passionate attachments in the flourishing life and offers theoretical and practical accounts of how we can cultivate them based on the Hellenistic conception of self-directed character change. *Cultivating Our Passionate Attachments* will be of interest to advanced students and scholars working in virtue ethics, moral philosophy and ancient philosophy. Fate and Fortune in European Thought, ca. 1400-1650 Ovanes Akopyan, 2021-04-26 If the universe were conceived to fulfill a certain divine plan or to manifest God's will and glory, what would the place of an individual be within this plan? What is more, if from the very beginning of its existence and through divine providence it were predestined to be driven toward a certain end, how could people adjust their individual lives to the incognizable universal design and react to the obscure future fraught with both luck and failure? These questions, which have occupied humanity for centuries, formed a remarkable element of early

modern European thought This collection of essays presents new insights into what shaped and constituted reflections on fate and fortune between roughly 1400 and 1650 both in word and image This volume argues that these ideas were emblematic of a more fundamental argument about the self society and the universe and shows that their influence was more widespread geographically and thematically than hitherto assumed Contributors Damiano Acciarino Ovanes Akopyan Elisabeth Blum Paul Richard Blum Jo Coture Guido Giglioni Dalia Judovitz Sophie Raux Orlando Reade and John Sellars
