What's Wrong with Climate Politics and How to Fix It Paul G. Harris, 2013-07-11 Governments have failed to stem global emissions of carbon dioxide and other greenhouse gases causing climate change Indeed climate changing pollution is increasing globally and will do so for decades to come without far more aggressive action What explains this failure to effectively tackle one of the world's most serious problems And what can we do about it To answer these questions Paul G Harris looks at climate politics as a doctor might look at a very sick patient He performs urgent diagnoses and prescribes vital treatments to revive our ailing planet before it's too late The book begins by diagnosing what's most wrong with climate politics including the anachronistic international

system which encourages nations to fight for their narrowly perceived interests and makes major cuts in greenhouse pollution extraordinarily difficult the deadlock between the United States and China which together produce over one third of global greenhouse gas pollution but do little more than demand that the other act first and affluent lifestyles and overconsumption which are spreading rapidly from industrialized nations to the developing world The book then prescribes several remedies for the failed politics of climate change including a new kind of climate diplomacy with people at its center national policies that put the common but differentiated responsibilities of individuals alongside those of nations and a campaign for simultaneously enhancing human wellbeing and environmental sustainability While these treatments are aspirational they are not intended to be utopian As Harris shows they are genuine workable solutions to what ails the politics of climate change today

Peace Psychology in Australia Diane Bretherton, Nikola Balvin, 2012-01-16 This book is a case study of the development of peace psychology in Australia While there is in comparison to other countries relatively little overt violence Australia the nation was founded on the dispossession of Indigenous people and their oppression continues today Peace Psychology in Australia covers the most significant issues of peace and conflict in the country It begins with a review of conflict resolution practices among Australia's ancient Indigenous cultures and succinctly captures topics of peace and conflict which the country has faced in the past 222 years since British settlement The fast population growth thriving multiculturalism leadership in international affairs and environmental isolation make Australia a microcosm for the study of human conflicts and peace movements

Turner, 2013-08-26 Society is one of the most frequently used words in public life it is also a foundational term in the social sciences In our own time however the idea has never been so much in dispute and so little understood For some critics society is simply too consensual for a world of intensive discord For others the idea of society is oppressive the very notion so some argue is dismissive of the infinite social differences that shape global realities In this erudite and original book two of the world's leading social theorists focus on unravelling the different meanings of society as a way of introducing the reader to contemporary debates in social theory The authors argue provocatively that all ideas of society can be assigned to one of three analytical categories or some

combination of these structure solidarity or creation and develop a fresh characterization of the nature of the social as a means of understanding global transformations By integrating abstract problems of social theory with empirical examples and political analysis On Society provides lucid interpretations of classical and contemporary social theory The book also critiques recent social theories that simply equate the demise of society with globalization the communications revolution or multiculturalism and in so doing provides an original insight into today s world
