**Rabbit Biotechnology** Louis-Marie Houdebine,Jianglin Fan,2009-04-24 Louis Marie Houdebine and Jianglin Fan The study of biological functions of proteins and their possible roles in the pathogenesis of human diseases requires more and more relevant animal models Although mice including genetically modified mice offer many possibilities other non murine species are absolutely required in some circumstances Rabbit is one of these species which has been widely used in biomedical studies This animal is genetically and physiologically closer to humans including cardiovascular system and metabolism characteristics Rabbit is thus more appropriate than mice to study some diseases such as atherosclerosis and lipid metabolism Because of its larger size surgery manipulation bleeding and turn over studies are much easier performed in rabbits than in mice Furthermore transgenic rabbits can be produced using microinjection and other methods such as

lentiviral vectors Cloning in rabbits has been proved possible even though still laborious and time consuming Hopefully functional rabbit ES cell lines will be available in the coming years Gene deletion or knock out in rabbits will then become possible Internal secretion and the ductless glands Swale Vincent,1922 *Laboratory Animal Medicine* Lynn C. *Molecular and Cellular Aspects of Muscle Contraction* Haruo Sugi, 2012-12-06 This volume presents the proceedings of a muscle symposium which was supported by the grant from the Fujihara Foundation of Science to be held as the Fourth Fujihara Seminar on October 28 November 1 2002 at Hakone Japan The Fujihara Seminar covers all fields of natural science while only one proposal is granted every year It is therefore a great honor for me to be able to organize this meeting Before this symposium I have organized muscle symposia five times and published the proceedings Cross bridge Mechanism in Muscle Contraction University of Tokyo Press 1978 Contractile Mechanisms in Muscle plenum 1984 Molecular Mechanisms of Muscle Contraction plenum 1988 Mechanism of Myofibril Sliding in Muscle contraction plenum 1993 Mechanisms of Work Production and Work Absorption in Muscle plenum 1998 As with these proceedings this volume contains records of discussions made not only after each presentation but also during the periods of General Discussion in order that general readers may properly evaluate each presentation and the up to date situation of this research field It was my great pleasure to have Dr Hugh Huxley a principal discoverer of the sliding filament mechanism in muscle contraction in this meeting On my request Dr Huxley kindly gave a special lecture on his monumental discovery of myofibril lattice structure by X ray diffraction of living skeletal muscle I hope general readers to learn how a breakthrough in a specific research field can be achieved **Mechanisms of Work Production and Work Absorption in Muscle** Haruo Sugi, Gerald H.

Pollack, 2012-12-06 In contrast to common practice we have always tried to include as many discussions held at the meeting in our proceedings as possible so as to enable readers to properly evaluate each paper presented as well as to learn of future prospects in this field of research Although the policy of including discussions occasions a long publication delay we believe that it is worth repeating in our future publication as we have met a number of young investigators fascinated by the discussions in our proceedings In the concluding remarks in this volume Dr Hugh E Huxley a principal architect of the sliding filament mechanism of muscle contraction states that the molecular mechanism of myofibril sliding remains mysterious to all of us We hope that this volume will stimulate muscle investigators to design and perform novel experiments to clarify the mysteries in muscle contraction Haruo Sugi and Gerald H Pollack excerpted from the Preface Excitation-Contraction

Coupling and Cardiac Contractile Force Donald Bers, 2012-12-06 How is the heartbeat generated What controls the strength of contraction of heart muscle What are the links between cardiac structure and function How does our understanding of skeletal and smooth muscle and non muscle cells influence our thinking about force development in the heart Are there important species differences in how contraction is regulated in the heart How do the new molecular data fit together in understanding the heart beat What goes wrong in ischemia hypertrophy and heart failure This book paints a modern portrait of how the heart works and in this picture the author shows a close up of the structural biochemical and physiological links between excitation and contraction The author takes the reader through a series of important interrelated topics with great clarity and continuity and also includes many useful illustrations and tables The book starts by considering the cellular structures involved in excitation contraction coupling and then described the characteristics of the myofilaments as the end effector of excitation contraction coupling A general scheme of calcium regulation is described and the possible sources and sinks of calcium are discussed in simple but quantitative terms The cardiac action potential and its many underlying currents are reviewed Then the characteristics of some key calcium transport systems calcium channels sodium calcium exchange and SR calcium uptake and release are discussed in detail This is then built into a more integrated picture of calcium regulation in succeeding chapters by detailed discussions of excitation calcium coupling mechanisms in skeletal cardiac and smooth muscle the interplay between calcium regulatory processes and finally mechanisms of cardiac inotropy calcium overload and dysfunction e g ischemia hypertrophy and heart failure **Coupling and Cardiac Contractile Force** Second Edition is an invaluable source of information for anyone who is interested in how the heart beat is controlled and especially suited for students of the cardiovascular system at all levels from medical graduate students through senior investigators in related fields
