## **The Respiratory Tract In Pediatric Critical Illness And Injury:**

The Respiratory Tract in Pediatric Critical Illness and Injury Derek S. Wheeler, Hector R. Wong, Thomas P.

Shanley, 2008-12-18 The principal role of the respiratory system is to permit efficient exchange of respiratory gases O<sub>2</sub> and CO<sub>2</sub> with the environment. The respiratory system is unique in that it is constantly exposed to a barrage of foreign substances from both the internal environment at any one point in time; approximately one half of the cardiac output is received by the lungs and the external environment with each breath. The respiratory tract is exposed to pollens, viruses, bacteria, smoke, etc. According to the Centers for Disease Control and Prevention, diseases of the respiratory system were the seventh and eighth leading causes of deaths in children aged 1 to 19 years in 2003. Dr. George A. Gregory, one of the founding fathers of pediatric critical care medicine, once estimated that acute respiratory failure accounts for nearly 50% of all admissions to the pediatric intensive care unit (PICU). Just as important are the many diseases that affect the respiratory system that are not associated with acute respiratory failure but nevertheless constitute a major portion of the practice of pediatric critical care medicine, some of which account for significant morbidity and mortality. Once again, we would like to dedicate this textbook to our families and to the physicians and nurses who provide steadfast care every day in pediatric intensive care units across the globe. Derek S. Wheeler, Hector R. Wong, Thomas P.

Wheeler, Hector R. Wong, Thomas P. Shanley, 2008-12-23 Neurologic emergencies are a common reason for admission to the pediatric intensive care unit PICU A thorough understanding of the diseases and disorders affecting the pediatric central nervous system is vital for any physician or healthcare provider working in the PICU In the following pages an international panel of experts provides an in depth discussion on the resuscitation stabilization and ongoing care of the critically ill or injured child with central nervous system dysfunction Once again we would like to dedicate this textbook to our families and to the physicians and nurses who provide steadfast care every day in pediatric intensive care units across the globe Derek S Wheeler Hector R Wong Thomas P Shanley v Preface to Pediatric Critical Care Medicine Basic Science and Clinical Evidence The field of critical care medicine is growing at a tremendous pace and tremendous advances in the understanding of critical illness have been realized in the last decade My family has directly benefited from some of the technological and scientific advances made in the care of critically ill children My son Ryan was born during my third year of medical school By some peculiar happenstance I was nearing completion of a 4 week rotation in the newborn intensive care unit NICU *Disorders of the Neonatal Airway* Janet Lioy, Steven E. Sobol, 2015-01-07 Disorders of the Neonatal Airway serves as a comprehensive multidisciplinary resource for all practitioners who care for neonates with airway disorders With the evolution of advances in neonatology and neonatal airway care over the past three decades the survival rate and life expectancy of premature newborns have dramatically increased to well over 50% in 24-25 week gestation infants Unfortunately survival with long term intubation has brought a corresponding increase in acquired airway disorders needing collaborative high level neonatal and otolaryngological care Additionally with the advent of fetal therapy congenital airway disorders now make up a substantial number of neonates with complex airway disorders Because of this fact there has been

increased focus on the multidisciplinary evaluation and management of neonatal airway disorders The book is organized into three sections the first focuses on Malformations and Deformations the second focuses on Assessment Evaluation and Treatment and the third discusses Education Simulation and Quality As one of the only comprehensive resources on the topic Disorders of the Neonatal Airway focuses on a multidisciplinary approach to the neonatal airway This unique approach makes this reference a must read for practitioners from many disciplines The book is organized into three sections the first focuses on Malformations and Deformations the second focuses on Assessment Evaluation and Treatment and the third discusses Education Simulation and Quality As one of the only comprehensive resources on the topic Disorders of the Neonatal Airway focuses on a multidisciplinary approach to the neonatal airway This unique approach makes this reference a must read for practitioners from many disciplines The book is organized into three sections the first focuses on Malformations and Deformations the second focuses on Assessment Evaluation and Treatment and the third discusses Education Simulation and Quality As one of the only comprehensive resources on the topic Disorders of the Neonatal Airway focuses on a multidisciplinary approach to the neonatal airway This unique approach makes this reference a must read for practitioners from many disciplines

Pediatric Respiratory Critical Illness: Etiology, Diagnosis, and Treatment Rujipat Samransamruajkit ,Hongxing Dang,Karen Ka Yan Leung,2025-09-25

Severe respiratory diseases in children such as severe pneumonia acute respiratory distress syndrome and severe bronchopulmonary dysplasia pose a significant threat to pediatric health Despite the advancements made by the medical community in these domains over the past few decades numerous unknown factors and challenges persist In order to identify improved etiological insights diagnostic techniques and therapeutic strategies we call upon the global medical community to strengthen collaborative efforts collectively propelling the further exploration of this field Our aim is to conduct in depth research on severe respiratory diseases in children investigating their etiology enhancing diagnostic methodologies and refining treatment approaches with the goal of elevating the standard of pediatric health and alleviating the burden on both families and society
