The Road to Holocaust Hal Lindsey,1990-05-01 Here is the bestselling author of *The Late Great Planet Earth* s most shocking revelation ever the disquieting facts about a new spiritual movement that would take over our churches and government and lead us to disaster Just as current events are converging into the precise pattern the biblical prophets predicted would herald the return of Jesus Christ a new movement has arisen within the Evangelical Church that denies it all allegorizing away the clear meaning of prophecy This movement commonly known as Dominion Theology reintroduces an old error that brought catastrophe to the Church and the Dark Ages to the world the same error that founded a legacy of contempt for the Jews and ultimately led to the Holocaust in Nazi Germany In clear compelling language Hal Lindsey sounds a vital warning about Dominion Theology and explains why he believes it poses such a great danger not only to Israel but to every Christian as well

Why Jesus Crossed the Road Bruce Main, 2010 If we are completely honest all of us have places situations and people whom we would rather avoid Yet in a world that was governed strictly by geographical religious and social barriers Jesus was audacious enough to cross the borders that kept people in safe categories He demonstrated that the God following life is one committed to entering the lives and stories of all people a life committed to the lost spiritual discipline of border crossing In *Why Jesus Crossed the Road* Bruce Main shows how God can use your own crossings to change your life and the lives of those you meet along the way

Global Easts Jie-Hyun Lim, 2022-07-05 South

Korean historian Jie Hyun Lim raised under an anticommunist dictatorship turned to Marxian thought to explain his country's development even as he came to struggle with its Eurocentrism. As a transnational scholar working in postcommunist Poland, Lim recognized striking similarities between Korean and Polish history and politics. One realization stood out: Both Korea and Poland at once the West for Asia yet Eastern Europe had been assigned the role of East. This book explores entangled Easts to reconsider global history from the margins. Examining the politics of history and memory, Lim reveals the affinities linking Eastern Europe and East Asia. He draws out commonalities in their experiences of modernity in their transitions from dictatorship to democracy and in the shaping of collective memory. Ranging across Poland, Germany, Israel, Japan, and Korea, Lim traces the global history of how notions of victimhood have become central to nationalism. He criticizes mass dictatorships of right and left in the Global Easts, considering Nazi jurist Carl Schmitt's notion of sovereign dictatorship and the concept of decisionist democracy. Lim argues that nationalism is inherently transnational, critiquing how the nationalist imagination of the Global East has influenced countries across borders. Theoretically sophisticated and conceptually innovative, this book sheds new light on the transnational complexity of historical memory and imagination, the boundaries between democracy and mass dictatorship, and the fluidity of East and West. *Last Days Madness* Gary DeMar, 1993-12

The Second World War in the Twenty-First-Century Museum Stephan Jaeger, 2020-02-24 The Second World War is omnipresent in contemporary memory debates. As the war fades from living memory, this study is the first to systematically analyze how Second World War museums allow prototypical visitors to comprehend and experience the past. It analyzes twelve permanent exhibitions in Europe and North America, including the Bundeswehr Military History Museum in Dresden, the Museum of the Second World War in Gdańsk, the House of European History in Brussels, the Imperial War Museums in London and Manchester, and the National WWII Museum in New Orleans, in order to show how museums reflect and shape cultural memory as well as their cognitive, ethical, emotional, and aesthetic potential and effects. This includes a discussion of representations of events such as the Holocaust and air warfare. In relation to narrative memory and experience, the study develops the concept of experientiality on a sliding scale between mimetic and structural forms, which provides a new textual-spatial method for reading exhibitions and understanding the experiences of historical individuals and collectives. It is supplemented by concepts like transnational memory, empathy, and encouraging critical thinking through difficult knowledge.
