Sustainability and Short-term Policies Stefan

Sjöblom, Kjell Andersson, Sarah Skerratt, 2016-04-01 There has been a profound change within the sphere of government and societal regulation in recent years Traditional hierarchical government has been challenged by new governance instruments relying on negotiations instead of command and control Alongside this development there has been a change in the time framing of politics and steering Traditional politics implicitly has been based on stability and permanence while new forms of governance explicitly are based on just in time actions such as projects and issue based collaborations in networks and programs This book analyses the implications of this shortening of time frames focusing particularly on spatial policy interventions Spatial policies have a special relevance when it comes to governance and new forms of societal steering On the one hand the local geographical level in politics is the principal battleground for the struggle between top down and bottom up approaches and aspirations On the other hand many of the most burning issues of our time require a global strategic approach for example climate change resource depletion population growth are anchored in space and the physical world Whether and how short term spatial approaches can achieve sustainable development outcomes is thus a critical question and forms the focus of this volume The book examines the characteristics of temporary policy measures across a range of rural urban and regional contexts in four continents Europe North America Oceania and Africa The outcomes and effects of these policies and interventions are analysed particularly focusing on the tension between short term interventions and long term effects

Interactive Political Leadership Eva Sørensen, 2020-01-09 Building on recent theories of interactive governance and political leadership Interactive Political Leadership develops a concept of interactive political leadership and a theoretical framework for studying the role of elected politicians in the age of governance The purpose of the theoretical framework is to inspire and guide empirical research into how elected politicians perform political leadership in a society where citizens and other stakeholders play an active role in making and implementing political decisions and what barriers challenges and dilemmas they encounter in relation to the performance of interactive political leadership The research framework draws extensively on recent theories of interactive governance and political leadership and other new developments in political science and public administration research Moreover it finds inspiration in current tendencies and embryonic examples of interactive political leadership performed by elected politicians operating at different levels of governance in Western liberal democracies The basic assumption is that political legitimacy is essential for the survival of a

political system and that interactive political leadership stands out as a promising way of securing what political scientists denote as input throughput output and outcome legitimacy in the age of governance Hence interactive political leadership aims to establish a bridge between representative democracy and emergent forms of political participation to promote political learning and accountability to strengthen the political entrepreneurship of elected politicians and to advance the political system's implementation capacity through resource mobilization The book develops 20 propositions that sets the agenda for a new and much needed field of empirical research into political leadership in the age of governance *Neue Bücher und Aufsätze in der Bibliothek* Germany.
