Susko, 2025-09-10 The Birth and Unfolding of Phases in History From Neolithic to World Pueblo and U S History brings together four major works into a single arc of human time Michael A Susko argues that the rhythm of history is not confined to the rise of empires but begins in the Neolithic with triadic 45 year generations that set the first phases of historical time in motion Using this framework the book explores Neolithic atalh y k as a non empire model of symbolic and generational phasing This Initial work is in progress World history through Egypt Judah Israel Rome and the Medieval Modern era contrasting empire based and prophetic alternatives Ancestral Pueblo history as a more egalitarian path outside empire s mold U S history as a largely empire driven model tempered by ideals of freedom and equality This panoramic view balances empire and non empire trajectories showing how civilizations universalize their visions either through force or through sharing covenant and inclusion Written in accessible language yet grounded in rigorous patterning it invites readers to see history not as inevitable

empire but as a set of choices that continue to shape our present and future

Gender and Change in Archaeology Nona Palıncaş, Ana Cristina Martins, 2024-03-29 This volume presents the various ways in which the study of gender makes a difference in archaeological research the archaeological academic milieu and the wider public's thinking about gender and considers avenues of future development It addresses questions such as why gender matters for archaeology while examining gender from various angles including aspects such as subjectivity embodiment diet multifaceted perspectives and intersectionality and in various periods prehistory Ancient Egypt Roman antiquity the Middle Ages and the modern and contemporary periods It also discusses the relationship between archaeology and other academic fields involving the study of gender as well as representations and debates on gender in the media The theme gender and change in archaeology emerged out of concerns voiced within the Archaeology and Gender in Europe AGE working community of the European Association of Archaeologists EAA with respect to the future of gender archaeology This book unites researchers of gender archaeology from two perspectives that of gender archaeologists from academic milieus where the study of gender has long been established and who in the meantime came to feel that this avenue of inquiry had become predictable and lost its provocative power and that of gender archaeologists from countries where this field was only recently introduced and who while more enthusiastic about the utility of gender archaeology are concerned with how to disseminate it among skeptical peers Both groups of archaeologists mainly argue that four decades on the study of gender in archaeology is still able to generate considerable change in our understanding of past and present day societies The volume is primarily of interest to archaeologists and researchers of gender studies

Substance of the Ancient Maya Andrew K. Scherer, Thomas G. Garrison, 2024-12-01 Substance of the Ancient Maya Kingdoms and Communities Objects and Beings collects twelve essays by top scholars that highlight what is new in research pertaining to the ancient Maya Subjects range from updated political histories of major kingdoms in the southern Maya Lowlands to explorations of the nature of Maya writing and materiality These essays were inspired by the scholarship of Stephen Houston and celebrate his transdisciplinary commitment to research in anthropological archaeology epigraphy and art history The contributions in this volume are organized into two sections that respectively reflect different scales from which to approach the substance of the ancient Maya from hand held objects to entire kingdoms This dichotomy reflects the breadth of questions central to current research on the Maya It also illustrates how certain themes such as the

relationship between the living and the realm of the supernatural are fundamental to both thinking by and about the Maya at all scales A diversity of methods is not only embodied by this assemblage of essays but is also spread equally across the two sections of the book illustrating that archaeologists epigraphers geographers and art historians can equally contribute to the substance of kingdoms and communities as they can to objects and beings Collectively these contributions show how the objects and beings that composed the Classic Maya world were both literal and sacred substances that mediated relations not only among living people but with gods and ancestors A final chapter by Stephen Houston reflects on unfinished projects of the ancient Maya as a metaphor for all of the work yet to be done to move forward in our studies of the past

Privileging Water in Lima, Mexico City, and New Orleans Clare Cardinal-Pett, 2024-11-20 Privileging Water in Lima Mexico City and New Orleans An Environmental History charts the development of the indigenous hydro social territories and their colonial transformations into modern political ecologies This book begins with a summary of the environmental histories of these regions before the arrival of people To give water its due as an agent of historical processes it is important to understand its role in shaping these three distinct ecosystems a role it still plays today despite thousands of years of human intervention in the hydrological nature of those systems It is certain that as human caused climate changes rework ecosystems worldwide surviving the Anthropocene in Mexico City New Orleans and Lima will require other ways of knowing water as hydro social territories that challenge modern notions of urbanism and foreground ways of knowing formerly considered archaic Following the inextricable histories of water and anthropogenic landscapes provokes many questions about the nature of cities especially questions of environmental justice The answers should not be abstract or universal Instead Clare Cardinal Pett argues that urbanization on the planet must be reimaged and reconstructed as bio regional systems and hydro social territories that can be best defined more comprehensively as political ecologies
