some hang around longer than others like Gothic literature which has existed ever since The Castle of Otranto in 1764 During this long while it has spread from England to the rest of Great Britain and across to the continent and off to America and Australia filling in the gaps more recently Most of it is in English but hardly all and it has adopted all styles from romanticism to modernism to postmodernism and even adjusted to feminist and queer literature and science fiction We have all read some Gothic tales or if not read then seen them in the cinema since they adapt well to film treatment and it would be hard to find anyone who has not heard of ghosts and vampires let alone Count Dracula and Frankenstein On the other hand

some of us are inveterate Gothic fans reading one book or story after the other The Historical Dictionary of Gothic Literature follows this long and winding path first in an extensive chronology and then a useful introduction which explains the nature of Gothic and shows how it has evolved Obviously the dictionary section has entries on major writers and some of the best known works but also on geographical variants like Irish Scottish or Russian Gothic and Female Gothic Queer Gothic and Science Fiction This is provided in over 200 often substantial and always intriguing entries More can be found in a detailed bibliography including general works but also more specialized ones on different styles and genres and also specific authors This book should certainly interest the fans but also more serious researchers Vampires Are Us Adler, Margot, 2014-03-01

Vampires Why do we care In these pages you will find what is very simply the most literate imaginative and just plain fascinating answer to that question ever written Whitley Strieber In a culture that does not do death particularly well we are obsessed with mortality Margot Adler writes Vampires let us play with death and the issue of mortality They let us ponder what it would mean to be truly long lived Would the long view allow us to see the world differently imagine social structures differently Would it increase or decrease our reverence for the planet Vampires allow us to ask questions we usually bury As Adler a longtime NPR correspondent and question asker sat vigil at her dying husband's bedside she found herself newly drawn to vampire novels and their explorations of mortality Over the next four years by now she has read more than 270 vampire novels from teen to adult from gothic to modern from detective to comic she began to see just how each era creates the vampires it needs Dracula an Eastern European monster was the perfect vehicle for 19th century England's fear of outsiders and of disease seeping in through its large ports In 1960s America Dark Shadows gave us the morally conflicted vampire struggling against his own predatory nature who still enthralls us today Think Spike and Angel Stefan and Damon Bill and Eric the Cullens Vampires Are Us explores the issues of power politics morality identity and even the fate of the planet that show up in vampire novels today Perhaps Adler suggests our blood is oil perhaps our prey is the planet Perhaps vampires are us **The Palace** Chelsea Quinn Yarbro, 2001-05 The anticipated paperback release of the second title in Yarbro's long running Saint Germain series featuring immortal vampire Francesco Ragooczy da San Germano Secluded in his Renaissance Florence palace he falls for a beautiful courtesan and loses all desire for isolation *Lies of the Land* Camille Serchuk, 2024-12-17 Lies of the Land examines the often overlooked artistic roots of mapmaking practice in early modern France offering an original perspective on discourses of accuracy and their relationship to the pictorial origins of modern mapmaking Until the seventeenth century most mapmakers in France were painters Schooled in techniques of drawing and perspective and in the careful study of nature that we associate with early modernity they also learned the more expressive and imaginative Mannerist forms that dominated French painting in this period Their maps draw on conventions of both painting and mapmaking to create beautiful informative and persuasive images for a wide variety of contexts and purposes In this book Camille Serchuk explores the strategies these cartographers deployed to weave together accuracy ornament and

artifice in maps at all scales Looking beyond the techniques of measurement and perspective Serchuk shows how painterly interventions framed and manipulated the appearance and reception of cartographic objects Lies of the Land is an important new assessment of the character and status of early modern cartography that challenges binary distinctions between art and science and between decorative and epistemic images It will appeal especially to art historians and historians of sixteenth century France as well as scholars of map history **Saint Germain** Elizabeth Clare Prophet,1990-03 *Cycling in Europe - An Illustrated Hand-Book of Information for the use of Touring Cyclists* F.
