The Paradoxical Foundation Of Strategic Management Contributions To Management Science:

The Paradoxical Foundation of Strategic Management Andreas Rasche, 2007-10-25 This book offers a systematic critique of the scientific discourse of strategic management. It uncovers scholars' unquestioned assumptions and shows that by upholding these assumptions, researchers obscure the paradoxical nature of strategic reasoning. To uncover the paradoxes of strategic management, the author refers to the philosophy of Jacques Derrida. He exposes the paradoxes that inevitably occur when theorizing about corporate strategy along the dimensions strategy context, process, and content, and shows how these paradoxes can enrich future thinking about strategic problems. The analysis is completed by a discussion of theoretical and practical implications which highlight the need to research strategy not as something an organization has but as something an organization does. Such a practice perspective gives reference to the paradoxical ground that strategic management rests on and enriches scholars' ability to reflect on practitioners' tasks while doing strategy in organizations. *Interdisciplinary Dialogues on Organizational Paradox* Rebecca Bednarek, Miguel Pina e Cunha, Jonathan Schad, Wendy K. Smith, 2021-07-08 *Interdisciplinary Dialogues on Organizational Paradox* is an innovative two-part volume that enriches our understanding about paradox. Part B continues the exploration of the why, how, and where of interdisciplinary research within paradox theory by looking at the realms of social structure and expression. **Philosophy and Organization Theory** Haridimos Tsoukas, Robert Chia, 2011-02-03 What is the relationship between philosophy and organization theory (OT)? This title includes the papers that explore connections between several streams in philosophy and OT. It explores the question: What does a particular philosophy contribute to OT? Cambridge Handbook of Strategy as Practice Damon Golsorkhi, Linda Rouleau, David Seidl, Eero Vaara, 2010-08-26 The *Cambridge Handbook of Strategy as Practice* provides a comprehensive overview of an emerging and growing stream of research in strategic management. An international team of scholars has been assembled to produce a systematic introduction to the various epistemological, methodological, and theoretical aspects of the strategy as practice approach. This perspective explores and explains the contribution that strategizing makes to daily operations at all levels of an organization. Moving away from a disembodied and asocial study of firm assets, technologies, and practices, the strategy as practice approach breaks down many of the traditional paradigmatic boundaries in strategy to investigate who the strategists are, what strategists do, how they do it, and what the consequences or outcomes of their actions are. Including a number of detailed empirical studies, the handbook will be an essential guide for future research in this vibrant field. *Sustainable Human Resource Management* Ina Ehnert, 2009-07-07 Predictions are that sustainability becomes the next big topic for Human Resource Management after internationalization and globalization. This book gives new answers to these questions: How can HRM contribute to attracting, developing, and retaining highly qualified human resources over time? How can a paradox perspective contribute to understanding and coping with paradoxical tensions? How can sustainability be used as a deliberate strategy for HRM? The conceptual part of the book looks at the notion of

sustainability opens it up for Strategic HRM and identifies blind spots in Strategic HRM theory Paradox theory is introduced as an analytical framework for Sustainable HRM Initial suggestions are made for sustainability strategies and for coping with paradoxes and tensions The exploratory part examines how 50 European Multinationals communicate their understanding of sustainability and HRM and which HR issues and practices they are linking to the topic

The Role of Universities in the Europe 2020 Strategy Alessandra Ricciardelli, 2017-10-31 This book provides a unique study of the role of universities as organisation systems in the pursuit of the Europe 2020 strategy While Europe 2020 focuses on creating the basis for the advancement and cohesion of the EU's member states it also has an important role in influencing the development strategies for potential candidate states In this regard the book examines two new member states Slovenia and Croatia and two potential EU candidate states Serbia and Kosovo in the Western Balkans Based on these cases the author argues that the operationalization of the Europe 2020 strategy depends to a great extent of the role and contribution of tertiary organisations such as educational institutions i.e. public and private universities and therefore requires the formulation of an economic development strategy at the national level that is capable of duly allocating the available financial resources The study suggests that the paradigm shift represented by Europe 2020 has helped to forge a new academic identity adding to the relevance of university organisations as fundamental agents for the promotion of economic development in addition it shows that an intensive learning process involving major structural changes is underway in the four countries discussed as well as many other EU member states

Industrial Product Service Systems IPS2 which is defined as an integrated industrial product and service offering that delivers value in use has expanded rapidly over the last decade IPS2 has allowed us to achieve both high added value and high productivity and has enriched our QOL by improving the performance of products and services We are now struggling with many awkward issues related to sustainability but IPS2 is expected to be the philosopher's stone for solving these issues Following the pattern of conferences held in Cranfield in 2009 Link ping in 2010 and Braunschweig in 2011 the fourth International CIRP Conference on Industrial Product Service Systems held on November 8-9 2012 in Tokyo will cover various aspects of IPS2 Topics planned for this year's conference reflect the latest IPS2 information in both the natural sciences and humanities and include case studies from various industries IPS2 is still a relatively new field so it is important to keep track of the entire context in order to promote more cross sectional cooperation between multimodal fields and disciplines The fourth International CIRP Conference on Industrial Product Service Systems will serve as a vital platform for such collaborations and the discussion of new scientific ideas *Scientific Research Effectiveness* J. Hurley, 2012-12-06 Baruch S Blumberg NASA Astrobiology Institute Ames Research Center Moffett Field CA USA Scientific research is one of the major human enterprises Many governments are convinced that research and its products provide the means to enrich an economic life that is no longer sustained by traditional manufacturing and service industries The public has a high expectation of medical research and many are convinced that with the expenditure of sufficient money all human diseases can be conquered they look forward to a long and disease free life There is also a great interest in many sectors of society to understand nature not only in order to control it or learn how best to cope with its uncertainties but to accumulate knowledge for its own sake Finally scientific research contributes significantly to the intellectual stores of humanity and provides an important process to explore the most profound questions of life Modern science is rarely a solitary occupation It requires heavy investments in equipment supplies buildings and field capabilities Scientists need a band of fellow explorers with whom to share the adventure discuss experiments and results and perhaps most importantly enable the testing and retesting of their hypotheses by themselves and by others This was certainly the case in my own research which led eventually to the discovery of the Hepatitis B virus and later to the vaccine for it Scientific training is very specialized whereas the solutions to problems transcend narrow disciplinary borders *Research Methodology in Strategy and Management* Donald D. Bergh, David J. Ketchen Jr., 2009-05-26 Strategic management relies on an array of complex methods drawn from various allied disciplines to examine how managers attempt to lead their firms toward success This book discusses about key methodology issues in the strategic management field **Learning Mechanisms in Process Improvement Initiatives** John David Hanson, 2006
