INTERNATIONAL ASSESSMENT (2009: HARVARD UNIV.),2011 **The People's Republic of China at 60** William C. Kirby,2020-10-26 In 2009 the Fairbank Center for Chinese Studies convened a major conference to discuss the health and longevity of China s ruling system and to consider a fundamental question After three decades of internal strife and turmoil followed by an era of reform entrepreneurialism and internationalization is the PRC here for the dynastic long haul Bringing together scholars and students of China from around the world the gathering witnessed an energetic exchange of views on four interrelated themes polities social transformations wealth and well being and culture belief and practice Edited and expanded from the original conference papers the wide ranging essays in this bilingual volume remain true to the conference s aim to promote open discussion of the past present and future of the People s Republic of China **The People's Republic of China at 60** William C. Kirby,2011 To mark the sixtieth anniversary of the PRC the Fairbank Center for Chinese Studies convened a conference to consider this question After three decades of internal strife followed by reform entrepreneurialism and internationalization is the PRC here for the dynastic long haul This volume presents an energetic exchange of views on the topic **The Tragedy of Liberation** Frank Dikötter,2013-09-24 A groundbreaking chronicle of the violent early years of the People s Republic of China by the author of the BBC Samuel Johnson Prize winning Mao s Great Famine The Chinese Communist party refers to its victory in 1949 as a liberation In China the story of liberation and the revolution that followed is not one of peace liberty and justice It is first and foremost a story of calculated terror and systematic violence So begins Frank Dik tter s stunning and revelatory chronicle of Mao Zedong s ascension and campaign to transform the Chinese into what the party called New People Following the defeat of Chiang Kai shek in 1949 after a bloody civil war Mao hoisted the red flag over Beijing s Forbidden City and the world watched as the Communist revolution began to wash away the old order Due to the secrecy surrounding the country s records little has been known before now about the eight years that followed preceding the massive famine and Great Leap Forward Drawing on hundreds of previously classified documents secret police reports unexpurgated versions of leadership speeches eyewitness accounts of those who survived and more The Tragedy of Liberation bears witness to a shocking largely untold history Interweaving stories of ordinary citizens with tales of the brutal politics of Mao s court Frank Dik tter illuminates those who shaped the liberation and the horrific policies they implemented in the name of progress People of all walks of life were caught up in the tragedy that unfolded and whether or not they supported the revolution all of them were asked to write confessions denounce their friends and answer queries about their political reliability One victim of thought reform called it a carefully cultivated Auschwitz of the mind Told with great narrative sweep The Tragedy of Liberation is a powerful and important document giving voice at last to the millions who were lost and casting new light on the foundations of one of the most powerful

regimes of the twenty first century Carbon Technocracy Victor Seow,2023-05-10 A forceful reckoning with the relationship between energy and power through the history of what was once East Asia s largest coal mine The coal mining town of Fushun in China s Northeast is home to a monstrous open pit First excavated in the early twentieth century this pit grew like a widening maw over the ensuing decades as various Chinese and Japanese states endeavored to unearth Fushun s purportedly inexhaustible carbon resources Today the depleted mine that remains is a wondrous and terrifying monument to fantasies of a fossil fueled future and the technologies mobilized in attempts to turn those developmentalist dreams into reality In Carbon Technocracy Victor Seow uses the remarkable story of the Fushun colliery to chart how the fossil fuel economy emerged in tandem with the rise of the modern technocratic state Taking coal as an essential feedstock of national wealth and power Chinese and Japanese bureaucrats engineers and industrialists deployed new technologies like open pit mining and hydraulic stowage in pursuit of intensive energy extraction But as much as these mine operators idealized the might of fossil fuel driven machines their extractive efforts nevertheless relied heavily on the human labor that those devices were expected to displace Under the carbon energy regime countless workers here and elsewhere would be subjected to invasive techniques of labor control ever escalating output targets and the dangers of an increasingly exploited earth Although Fushun is no longer the coal capital it once was the pattern of aggressive fossil fueled development that led to its ascent endures As we confront a planetary crisis precipitated by our extravagant consumption of carbon it holds urgent lessons This is a groundbreaking exploration of how the mutual production of energy and power came to define industrial modernity and the wider world that carbon made
