The Qualia Revolution Peter Wilberg, 2004-04 The most fundamental scientific fact is not the existence of the physical universe but our awareness of that universe Not even the most advanced physics physiology or psychology however can explain even the most elementary qualities of our sensory awareness of that universe qualities such as redness for example Qualia used to be defined as sensory qualities such as colour and tone But what if awareness is not an empty receptacle for sensory impressions but has its own intrinsic sensual qualities of the sort we experience as the inwardly sensed shape and substantiality of our bodies the sensed lightness or darkness colour or tone of our moods or a sensed feeling of warmth or coolness closeness or distance to another human being What if such sensual qualities of awareness are intrinsically meaningful being the felt essence of meaning or sense is not energetic quanta but qualia in this sense sensed and sensual qualities of awareness that are the basic stuff of which the universe is composed It argues that qualia are not simply qualities of our own human awareness but fundamental units of awareness Atoms molecules and cells are recognised as the physical form taken by field patterns of atomic molecular and cellular awareness composed of such units The soul is understood as an ever changing gestalt of such units each of which possess characteristics of both unit and field particle and wave allowing the soul qualities of our own awareness to mix and merge with those of all other beings

Shaman Pieter F. Craffert, 2008-01-01 Historical Jesus research remains trapped in the positivistic historiographical framework from which it emerged more than a hundred and fifty years ago This is confirmed by the nested assumptions shared by the majority of researchers These include the idea that a historical figure could not have been like the Gospel portrayals and consequently the Gospels have developed in a linear and layered fashion from the authentic kernels to the elaborated literary constructions as they are known today The aim of historical Jesus research therefore is to identify the authentic material from which the historical figure as a social type underneath the overlay is constructed Anthropological historiography offers an alternative framework for dealing with Jesus of Nazareth as a social personage fully embedded in a first century Mediterranean worldview and the Gospels as cultural artifacts related to this figure The shamanic complex can account for the cultural processes and dynamics related to his social personage This cross cultural model represents a religious pattern that refers to a family of features for describing those religious entrepreneurs who based on regular Altered State of Consciousness experiences perform a specific set of social functions in their communities This model accounts for the wide spectrum of the data ascribed to Jesus of Nazareth while it offers a coherent framework for constructing the historical Jesus as a social personage embedded in his worldview As a Galilean shamanic figure Jesus typically performed healings and exorcisms he controlled the spirits while he also acted as prophet teacher and mediator of divine knowledge
