The book suggests ways and means to follow for knowledge management implementation especially for organizations with multiple business verticals to follow. The book underlines that knowledge is both an entity and organizational asset which can be managed. A holistic view of knowledge management implementation has been provided. It also emphasizes the phenomenological importance of human resource parameters as compared to that of technological parameters. Various hypotheses have been tested to validate the significant models hypothesized. Urbanismo - Gabriel Alomar Esteve: Mallorcan Town Planner Richard Buswell, 2022-04-15 Gabriel Alomar Esteve 1910 1997 was an architect town planner and historian His early ideas in town planning were largely pragmatic seeking to address problems of the quality of life and the future traffic circulation in the historic core of his native city Palma and its suburbs He inherited plans for reform from previous generations of

Mallorcan planners including Eusebio Estada 1843 1917 Bernat Calvet 1864 1941 and Guillem Forteza 1892 1943 who in turn were influenced by Idelfonso Cerd 1815 1876 the Barcelona planner and his concept of the eixample or ensanche Some of his plan for Palma was financed by the enigmatic Juan March but under the post Civil War policy of autarky little of what he proposed was built However a short sojourn in the United States at MIT in the mid 1940s brought him into contact with American and British theories Much of his practice developed during the Franco regime although he had little sympathy for its politics Later he designed few other complete town plans but his influence on the social aspects of Spanish planning in the 50s and 60s was considerable His subsequent professional practice was largely devoted to urban conservation and the development of green spaces in cities and towns His ideas are located between Anglo Saxon planning theories and Mediterranean urbanismo when town planning as a discipline began to emerge from its origins in engineering and architecture as part of its transition from planeamientos to proyectos

Handbook of Gentrification Studies Loretta Lees, Martin Phillips, 2018-04-27. It is now over 50 years since the term gentrification was first coined by the British urbanist Ruth Glass in 1964, in which time gentrification studies has become a subject in its own right. This Handbook, the first ever in gentrification studies, is a critical and authoritative assessment of the field. Although the Handbook does not seek to rehearse the classic literature on gentrification from the 1970s to the 1990s in detail, it is referred to in the new assessments of the field gathered in this volume. The original chapters offer an important dialogue between existing theory and new conceptualisations of gentrification for new times and new places in many cases, offering novel empirical evidence.

The Routledge Handbook of Memory Activism Yifat Gutman, Jenny Wüstenberg, 2023-02-15. This Handbook is the first systematic effort to map the fast-growing phenomenon of memory activism and to delineate a new field of research that lies at the intersection of memory and social movement studies. From Charlottesville to Cape Town, from Santiago to Sydney, we have recently witnessed protesters demanding that symbols of racist or colonial pasts be dismantled and that we talk about histories that have long been silenced. But such events are only the most visible instances of grassroots efforts to influence the meaning of the past in the present. Made up of more than 80 chapters that encapsulate the rich diversity of scholarship and practice of memory activism by assembling different disciplinary traditions, methodological approaches, and empirical evidence from across the globe, this Handbook establishes important questions and their theoretical implications arising from the social, political, and economic reality of memory activism. Memory activism is multifaceted, takes place in a variety of settings, and has diverse outcomes, but it is always crucial to understanding the constitution and transformation of our societies past and present. This volume will serve as a guide and
