The Origins Of Chinese Communism:

The Origins of Chinese Communism Arif Dirlik, 1989 Based on a wealth of archival material released after Mao's death this book offers a revisionist account of the introduction and triumph of Marxism in China Dirlik shows that in 1919 at the outset of the May Fourth Movement anarchism was the predominant ideology among revolutionaries and intellectuals and Marxism was virtually unknown Three years later however the Communist Party of China had emerged as the unchallenged leader of the Left Dirlik disputes long held beliefs about the domestic origins of Chinese Communism to argue that Communist thought and organization were brought into radical circles by the Comintern Though Chinese radicals would not have turned to Communism unassisted he concludes Marxist ideology took hold easily when introduced from the outside This book will prove indispensable to scholars of Chinese history and politics Asian studies Marxism and comparative communism

Chen,2013-03 Chinese Revolution in Practice Guo Wu,2023-10-24 This book employs multiple case studies to explore how the Chinese communist revolution began as an ideology oriented intellectual movement aimed at improving society before China's transformation into a state that suppresses dissenting voices by outsourcing its power of coercion and incarceration. The author examines the movement's methods of early self-organization, grass roots level engagement, creation of new modes of expression and popular art forms, manipulation of collective memory and invention of innovative ways of mass incarceration. Covering developments from 1920 to 1970, the book considers a wide range of Chinese individuals and groups from early Marxists to political prisoners in the PRC to illustrate a dynamic interactive process in which the state and individuals contend with each other. It argues that revolutionary practices in modern China have created a regime that can be conceptualized as an ideology-military-propaganda state that prompts further reflection on the relationships between revolution and the state, the state and collective articulation and memory, and the state and reflective individuals in a global context. Illustrating the continuity of the Chinese revolution and past decades' socialist practices and mechanisms, this study is an ideal resource for scholars of Chinese history, politics, and twentieth-century revolutions. **The Cambridge History of China** Denis Crispin Twitchett, John King Fairbank, 1978 International scholars and sinologists discuss culture, economic growth, social change, political processes, and foreign influences in China since the earliest pre-dynastic period. The Found Generation Marilyn A. Levine, 2016-06-01 In contrast to the Lost Generation of youth in the West who were disoriented and disillusioned by the First World War and its aftermath, the Chinese youth born between 1895 and 1905 not only believed they had a duty to save their nation but pursued their goal through social and political experimentation. The vigorous purpose and optimism of this Found Generation contrasted with the apathy and detachment of their Western counterparts who followed a different path in coming to terms with the new world of the twentieth century. Just after the First World War, sixteen hundred Chinese young men and women traveled to Europe, most of them to France as members of the Work Study Movement. Their goal was to study Western technology and culture and utilize this knowledge to achieve national salvation, and they planned to finance their study at European schools by factory work. While in Europe, many of these students became politicized, partly through their exposure to European political ideas such as Marxism and partly through the social network based on shared experience that transcended what would have separated them in China. One important result of this political activity was the formation of the European Branches of the Chinese Communist Organizations (ECCO). The Found Generation explores the origins, development, and significance of the ECCO, highlights the differences between it and the Communist home organization, and describes its impact on the Chinese Communist Party. The founders of the ECCO shared values and goals with their compatriots in China, but their experiences and opportunities in Europe molded them in different ways that can be traced in their later careers. On their return to China, many of the young activists, including Zhou Enlai, Deng Xiaoping, Chen Yi, Cai Hesen, Li Lisan, Zhu De, Nie Rongzhen, and Wang Ruofei, quickly assumed powerful positions in Chinese politics, and their

influence is still felt today Levine's examination of the early experiences of this important cohort of Chinese leaders helps explain their adherence to the Leninist concept of Party discipline and their tenacious hold over central governmental power. The Found Generation is a pioneering study based on original sources including interviews with several prominent participants in the Work Study Movement and the ECCO Chinese studies and memoirs and Chinese and French periodicals. It provides otherwise unavailable information and analysis about the political leadership of modern China and by pointing out the differences between the Chinese radicals in Europe and in China it furthers our understanding of the conflicts, motivations, and values of modern Chinese leaders. *Biographic Dictionary of Chinese Communism, 1921-1965* Donald W. Klein, Anne B. Clark, 1971 *The Cambridge History of Twentieth-Century Political Thought* Terence Ball, Richard Bellamy, 2003-08-14

Table of contents **Chen Duxiu, Founder of the Chinese Communist Party** Lee Feigon, 2014-07-14 This book is the first complete study of Chen Duxiu, the controversial founder and first secretary general of the Chinese Communist Party. Disputing many conventional views of the New Culture movement and the early history of the party, Lee Feigon examines the social and political context of Chen's ideas and actions, particularly his relationship with the early Chinese youth movement.
