The Pleasure Gardens Of Virginia The Pleasure Gardens Of Virginia:

The Pleasure Gardens of Virginia Peter Martin, 2017-03-14 Using a rich assortment of illustrations and biographical sketches Peter Martin relates the experiences of colonial gardeners who shaped the natural beauty of Virginia's wilderness into varied displays of elegance. He shows that ornamental gardening was a scientific, aesthetic, and cultural enterprise that thoroughly engaged some of the leading figures of the period, including the British governors at Williamsburg and the great plantation owners George Washington, Thomas Jefferson, William Byrd, and John Custis. In presenting accounts of their gardening efforts, Martin reveals the intricacies of colonial garden design, plant searches, experimentation, and the problems in adapting European landscaping ideas to local climate. These writings also bring to life the social and commercial interaction between Williamsburg and the plantations, together with early American ideas about cultured living. While placing Virginia's gardening in the larger context of the colonial South, Martin tells a very human story of how this art both influenced and reflected the quality of colonial life. As Virginia grew economically and culturally, the garden became a projection of the gardener's personal identity, as exemplified by the endeavors of Washington and Jefferson at Mount Vernon and Monticello. In order to recapture the gardens as they existed in colonial times, Martin brings together paintings, drawings, and the findings of modern archaeological excavations. Originally published in 1991, *The Pleasure Gardens of Virginia* is now available in a new edition from the Princeton Legacy Library. Book jacket **Virginia's Historic Homes and Gardens**, 2009 Home to Jamestown, the first permanent English settlement in the New World, Virginia is in many ways the birthplace of America and the home of U.S. history. It is also literally the birthplace of eight presidents and numerous Revolutionary and Civil War heroes. Virginia was among the wealthiest southern states in the antebellum period, resulting in a long tradition of stately homes on luxuriant plantations. In addition to their elegant architecture and classic southern styling, these homes feature some of the most extravagant and noteworthy gardens on the eastern seaboard. From the James River Plantations to the Shenandoah foothills, *Virginia's Historic Homes and Gardens* celebrates the legendary houses and landscapes of Old Dominion. Virginia natives, the authors travel throughout the state to highlight the best of the famous and lesser-known homes. Including such national landmarks as George Washington's Mount Vernon and

Thomas Jefferson's Monticello the book brilliantly illustrates the homes exteriors and interiors as well as their gardens and landscaping Historical details accompany the exquisite color photographs along with useful information on each site's location

Lines that Divide James A. Delle, Stephen A. Mrozowski, Robert Paynter, 2000 The division of human society by race class and gender has been addressed by scholars in many of the social sciences Now historical archaeologists are demonstrating how material culture can be used to examine the processes that have erected boundaries between people Drawing on case studies from around the world the essays in this volume highlight diverse moments in the rise of capitalist civilization both in Western Europe and its colonies In the first section the contributors address the dynamics of the racial system that emerged from European colonialism They show how

archaeological remains shed light on the institution of slavery in the American Southeast on the treatment of Native Americans by Mormon settlers and on the color line in colonial southern Africa The next group of articles considers how gender was negotiated in nineteenth century New York City in colonial Ecuador and on Jamaican coffee plantations A final section focuses on the issue of class division by examining the built environment of eighteenth century Catalonia and material remains and housing from early industrial Massachusetts These essays constitute an archaeology of capitalism and clearly demonstrate the importance of history in shaping cultural consciousness Arguing that material culture is itself an active agent in the negotiation of social difference they reveal the ways in which historical archaeologists can contribute to both the definition and dismantling of the lines that divide

Gardenland Jennifer Wren Atkinson,2018-08

Garden writing is not just a place to find advice about roses and rutabagas it also contains hidden histories of desire hope and frustration and tells a story about how Americans have invested grand fantasies in the common soil of everyday life Gardenland chronicles the development of this genre across key moments in American literature and history from nineteenth century industrialization and urbanization to the twentieth century rise of factory farming and environmental advocacy to contemporary debates about public space and social

justice even to the consideration of the future of humanity's place on earth. In exploring the hidden landscape of desire in American gardens, *Gardenland* examines literary fiction, horticultural publications, and environmental writing, including works by Charles Dudley Warner, Henry David Thoreau, Willa Cather, Jamaica Kincaid, John McPhee, and Leslie Marmon Silko. Ultimately, *Gardenland* asks what the past century and a half of garden writing might tell us about our current social and ecological moment, and it offers surprising insight into our changing views about the natural world along with realms that may otherwise seem remote from the world of leeks and hollyhocks.

Thomas Jefferson on Taste and the Fine Arts M. Andrew Holowchak, 2022-09-20. Jefferson tended to classify the books of his libraries under the Baconian headings of memory, reason, and imagination, which corresponded to history, philosophy, and the fine arts. Thus, education in the Fine Arts, which Jefferson listed as eight, was considered an indispensable part of the life of an educated person, especially a Virginian. An educated person needed knowledge of architecture, gardening, painting, sculpture, rhetoric, belle lettres, poetry, music, and criticism, considered as a sort of meta-art. Knowledge of such arts was indispensable because each person, thought Jefferson, was equipped with a faculty of taste as well as ratiocination and a moral sense faculty, each of which required cultivation for human thriving. An uncultivated imagination would severely impair ratiocination and moral sensitivity. This book is the first book-length attempt to flesh out and critically assess Jefferson's views on taste and the Fine Arts. It is a must-read for any serious biographer of Jefferson.

George Washington, Architect Allan Greenberg, 1999. The building of a nation.

Wild, Tamed, Lost, Revived Diane Flynt, 2023-09-18. For anyone who's ever picked an apple fresh from the tree or enjoyed a glass of cider, writer and orchardist Diane Flynt offers a new history of the apple and how it changed the South and the nation. Showing how southerners cultivated over 2,000 apple varieties from Virginia to Mississippi, Flynt shares surprising stories of a fruit that was central to the region for over 200 years. Colorful characters abound in this history, including aristocratic Belgian immigrants, South Carolina plantation owners, and multiple presidents, each group changing the course of southern orchards. She shows how southern apples, ranging from northern varieties that found fame on southern soil to hyper-local apples grown by a single family, have a history beyond the region, from Queen Victoria's court to the Oregon Trail. Flynt also tells us the darker side of the story, detailing how apples were entwined with slavery and the theft of Indigenous land. She relates the ways southerners lost their rich apple culture in less than the lifetime of a tree and offers a tentatively hopeful future. Alongside unexpected apple history, Flynt traces the arc of her own journey as a pioneering farmer in the southern Appalachians, who planted cider apples never grown in the region and founded the first modern cidery in the South. Flynt threads her own story with archival research and interviews with orchardists, farmers, cidermakers, and more. The result is not only the definitive story of apples in the South but also a new way to challenge our notions of history.

A "Topping People" Emory G. Evans, 2009-04-14 A Topping People is the first comprehensive study of the political economic and social elite of colonial Virginia Evans studies twenty one leading families from their rise to power in the late 1600s to their downfall over one hundred years later These families represented the upper echelons of power serving in the upper and lower houses of the General Assembly often as speaker of the House of Burgesses Their names Randolph Robinson Byrd Carter Corbin Custis Nelson and Page to note but a few are still familiar in the Old Dominion some three hundred years later Their decline was due to a variety of factors economic social and demographic The third generations showed an inability to adapt their business philosophies to the changing economic climate Their inclination was to mirror the English landed gentry living off the income of their landed estates Economic diversification was the norm early on but it became less effective after 1730 Scots traders for example introduced chain stores making it more difficult to continue family run stores And land speculation was no substitute for diversification An increase in population resulted in the creation of new counties which weakened the influence of the Tidewater region These leading families began to spend more than they earned and became heavily indebted to British mercantile firms The Revolution only served to make matters worse and by 1790 these families had lost their political and economic status although their social status remained A Topping People is a thorough and engrossing study of the way families came to gain and eventually lose great power in this turbulent and progressive period in American history

The Front Garden Mary Riley Smith, 2001-02-27 The front yard is the stepchild of landscape design ignored in the current enthusiasm for gardening Typically with its high maintenance lawn and overgrown foundation planting the front yard doesn't enhance the house or provide useful living space for the homeowner Yet as new properties become smaller and old ones grow shadier the front garden may be the best place to grow vegetables or flowers to sit outside in comfort and privacy or even to swim or play tennis Mary Riley Smith a landscape designer who has often dealt with poorly planned and underused front properties has filled this book with creative ways to make your own front garden beautiful and functional She shows how to design paths driveways and parking areas and how to camouflage unattractive but necessary structures For privacy she describes the different virtues of fences clipped hedges and loose flowing hedgerows When it comes to planting in front of the house the choices are surprising instead of a lawn you might create a colorful cottage garden an edible landscape a drought tolerant meadow of regional native plants a sea of ornamental grasses or even a romantic orchard All of these landscapes and dozens more from all parts of the country are illustrated with beautiful photographs THE FRONT GARDEN concludes with nine case histories including the landscape designers plans that will give you even more ideas for turning your front yard into a beautiful garden

Historical Archaeology of the Delaware Valley, 1600-1850 Richard Veit, David Orr, 2014-01-30 The Delaware Valley is a distinct region situated within the Middle Atlantic states encompassing portions of Delaware Pennsylvania New Jersey and Maryland With its cultural epicenter of Philadelphia its surrounding bays and ports within Maryland and Delaware and its conglomerate population of European settlers Native

Americans and enslaved Africans the Delaware Valley was one of the great cultural hearths of early America The region felt the full brunt of the American Revolution briefly served as the national capital in the post Revolutionary period and sheltered burgeoning industries amidst the growing pains of a young nation Yet despite these distinctions the Delaware Valley has received less scholarly treatment than its colonial equals in New England and the Chesapeake region In *Historical Archaeology of the Delaware Valley 1600 1850* Richard Veit and David Orr bring together fifteen essays that represent the wide range of cultures experiences and industries that make this region distinctly American in its diversity From historic period American Indians living in a rapidly changing world to an archaeological portrait of Benjamin Franklin from an eighteenth century shipwreck to the archaeology of Quakerism this volume highlights the vast array of research being conducted throughout the region Many of these sites discussed are the locations of ongoing excavations and archaeologists and historians alike continue to debate the region s multifaceted identity The archaeological stories found within *Historical Archeology of the Delaware Valley 1600 1850* reflect the amalgamated heritage that many American regions experienced though the Delaware Valley certainly exemplifies a richer experience than most it even boasts the palatial home of a king Joseph Bonaparte elder brother of Napoleon and former King of Naples and Spain This work thoroughly based on careful archaeological examination tells the stories of earlier generations in the Delaware Valley and makes the case that New England and the Chesapeake are not the only cultural centers of colonial America
