The Oxford Handbook of European History, 1914-1945 Nicholas Doumanis, 2016-05-05

The period spanning the two World Wars was unquestionably the most catastrophic in Europe's history. Despite such undeniably progressive developments as the radical expansion of women's suffrage and rising health standards, the era was dominated by political violence and chronic instability. Its symbols were Verdun, Guernica, and Auschwitz. By the end of this dark period, tens of millions of Europeans had been killed and more still had been displaced and permanently traumatized. If the nineteenth century gave Europeans cause to regard the future with a sense of optimism, the early twentieth century had them anticipating the destruction of civilization. The fact that so many revolutions, regime changes, dictatorships, mass killings, and civil wars took place within such a compressed time frame suggests that Europe experienced a general crisis. The Oxford Handbook of European History, 1914-1945 reconsiders the most significant features of this calamitous age from a transnational perspective. It demonstrates the degree to which national experiences were intertwined with those of other nations and how each crisis was implicated in wider regional, continental, and global developments. Readers will find innovative and stimulating chapters on various political, social, and economic subjects by some of the leading scholars working on modern European history today.

The Routledge History Handbook of Central and Eastern Europe in the Twentieth Century Włodzimierz Borodziej, Sabina Ferhadbegović, Joachim von Puttkamer, 2020-04-21

Statehood examines the extending lines of development of nation-state systems in Eastern Europe, in particular considering why certain tendencies in state development found a different expression in this region compared to other parts of the continent. This volume discusses the differences between the social developments, political decisions, and historical experience that have influenced processes of state building, with a focus on the structural problems of the region and the different paths taken to overcome them. The book addresses processes of building social orders and examines the contribution of state institutions to social and cultural integration and disintegration. It analyses institutional and personnel continuities that have outlasted the great political changes of the twentieth century and addresses the expansion of state activity in shaping property relations in agriculture and industry, as well as in social security and family politics. Taking a comparative approach based on experiential history, allowing individual experience to be detached from specific national references, the volume delineates a transnational comparison of problems shared within the region as they have been passed down through history, providing definition to the specificity of Eastern Europe and situating the historical experience of the region within a pan-European context. The second in a four-volume set on Central and Eastern Europe in the twentieth century, it is the go-to resource for those interested in statehood and state building in this complex region.

Modern European History, 1350-1750 Hamish Scott, 2015-07-23 This Handbook re examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume I examines Peoples and Place assessing structural factors such as climate printing and the revolution in information social and economic developments and religion including chapters on Orthodoxy Judaism and Islam **The Quantum Dissidents** Olival Freire

Agriculture in Capitalist Europe, 1945-1960 Carin Martiin, Juan Pan-Montojo, Paul Brassley, 2016-06-17 In the years before the Second World War agriculture in most European states was carried out on peasant or small family farms using technologies that relied mainly on organic inputs and local knowledge and skills supplying products into a market that was partly local or national partly international The war applied a profound shock to this system In some countries farms became battlefields causing the extensive destruction of buildings crops and livestock In others farmers had to respond to calls from the state for increased production to cope with the effects of wartime disruption of international trade By the end of the war food was rationed when it was obtainable at all Only fifteen years later the erstwhile enemies were planning ways of bringing about a single agricultural market across much of continental western Europe as farmers mechanised motorized shed labour invested capital and adopted new technologies to increase output This volume brings together scholars working on this period of dramatic technical commercial and political change in agriculture from the end of the Second World War to the emergence of the Common Agricultural Policy in the early 1960s Their work is structured around four themes the changes in the international political order within which agriculture operated the emergence of a range of different market regulation schemes that preceded the CAP changes in technology and the extent to which they were promoted by state policy and the impact of these political and technical changes on rural societies in western Europe

Teaching a Dark Chapter Daniela R. P. Weiner, 2024-07-15 Teaching a Dark Chapter explores how textbook narratives about the Fascist Nazi past in Italy East Germany and West Germany followed relatively calm undisturbed paths of little change until isolated flashpoints catalyzed the educational infrastructure into periods of rapid transformation Though these flashpoints varied among Italy and the Germanys they all roughly conformed to a chronological scheme and permanently changed how each dark past was represented Historians have often neglected textbooks as sources in their engagement with the reconstruction of postfascist states and the development of postwar memory culture But as Teaching a Dark Chapter demonstrates textbooks yield new insights and suggest a new chronology of the changes in postwar memory culture that other sources overlook Employing a methodological and temporal rethinking of the narratives surrounding the development of European Holocaust memory Daniela R P Weiner reveals how long before 1968 textbooks in these three countries served as important tools to influence public memory about Nazi Fascist atrocities As Fascism had been spread through education then education must play a key role in undoing the damage Thus to repair and shape postwar societies textbooks became an avenue to inculcate youths with desirable democratic and socialist values Teaching a Dark Chapter weds the historical study of public memory with the educational study of textbooks to ask how and why the textbooks were created what they said and how they affected the society around them

seventeenth century In a single volume it offers a comprehensive introduction to scholarly contributions that have tended to be dispersed in journals and books not easily accessible to the student or general reader America and Romania in the Cold War Paschalis Pechlivanis, 2019-03-26 This book examines the US foreign policy of differentiation towards the socialist regimes of Eastern Europe as it was implemented by various administrations towards Ceausescu's Romania from 1969 to 1980 Drawing from multi archival research from both US and Romanian sources this is the first comprehensive analysis of differentiation and shows that Washington's Eastern European policy in the 1970s was more nuanced than the common East vs West narrative suggests By examining systemic Cold War factors such as the rise of détente between the two superpowers and the role of agency the study deals with the dynamics that shaped the evolution of American Romanian relations after Bucharest's opening towards the West and the subsequent embrace of this initiative by Washington as an instrument to undermine the unity of the Soviet bloc Furthermore it revises interpretations about Carter's celebrated human rights policy based on the Romanian case pointing towards a remarkable continuity between the three administrations under examination Nixon Ford and Carter By doing so this study contributes to the field by highlighting a largely neglected aspect of US foreign policy and uncovers the subtleties of Washington's relations with one of the most vigorous actors of the Eastern European bloc This book will be of much interest to students of Cold War Studies US foreign policy Eastern European politics and International Relations in general **The ^AOxford Handbook of Islamic Philosophy** Khaled El-Rouayheb, Sabine Schmidtke, 2016-10-03 The study of Islamic philosophy has entered a new and exciting phase in the last few years Both the received canon of Islamic philosophers and the narrative of the course of Islamic philosophy are in the process of being radically questioned and revised The bulk of twentieth century Western scholarship on Arabic or Islamic philosophy focused on the period from the ninth century to the twelfth It is a measure of the transformation that is currently underway in the field that the present Oxford Handbook has striven to give roughly equal weight to every century from the ninth to the twentieth **2012** Massimo Mastrogregori, 2016-11-21 Every year the Bibliography catalogues the most important new publications historiographical monographs and journal articles throughout the world extending from prehistory and ancient history to the most recent contemporary historical studies Within the systematic classification according to epoch region and historical discipline works are also listed according to author's name and characteristic keywords in their title The Max Planck Handbooks in European Public Law: Volume I: The Administrative State Sabino Cassese, Armin von Bogdandy, Peter Huber, 2017-07-24 The Max Planck Handbooks in European Public Law series describes and analyses the public law of the European legal space an area that encompasses not only the law of the European Union but also the European Convention on Human Rights and importantly the domestic public laws of European states Recognizing that the ongoing vertical and horizontal processes of European integration make legal comparison the task of our time for both scholars and practitioners it aims to foster the development of a specifically European legal pluralism and to contribute to the legitimacy and efficiency
