Land Rights and Expropriation in Ethiopia Daniel W. Ambaye,2015-02-13 This thesis provides a new approach to the Ethiopian Land Law debate The basic argument made in this thesis is that even if the Ethiopian Constitution provides and guarantees common ownership of land together with the state to the people this right has not been fully realized whether in terms of land accessibility enjoyability and payment of fair compensation in the event of expropriation Expropriation is an inherent power of the state to acquire land for public purpose activities It is an important development tool in a country such as Ethiopia where expropriation remains the only method to acquire land Furthermore the two preconditions of payment of fair compensation and existence of public purpose justifications are not strictly followed in Ethiopia The state remains the sole beneficiary of the process by capturing the full profit of land value while paying inadequate compensation to those who cede their land by expropriation Secondly the broader public purpose power of the state in expropriating the land for unlimited activities puts the property owners under imminent risk of expropriation

Private Law Robert Cochran, Jr, Michael Moreland, 2020-11-22 This volume examines the relationship between Christian legal theory and the fields of private law Recent years have seen a resurgence of interest in private law theory and this book contributes to that discussion by drawing on the historical theological and philosophical resources of the Christian tradition The book begins with an introduction from the editors that lays out the understanding of private law and what distinguishes private law topics from other fields of law This section includes two survey chapters on natural law and biblical sources The remaining sections of the book move sequentially through the fields of property contracts and torts Several chapters focus on historical sources and show the ways in which the evolution of legal doctrine in areas of private law has been heavily influenced by Christian thinkers Other chapters draw out more contemporary and public policy related implications for private law While this book is focused on the relationship of Christianity to private law it will be of broad interest to those who might not share that faith perspective In particular legal historians and philosophers of law will find much of interest in the original scholarship in this volume The book will be attractive to teachers of law political science and theology It will be of special interest to the many law faculty in property contracts and torts as it provides a set of often overlooked historical and theoretical perspectives on these fields Law and Economics of Possession Yun-chien Chang, 2015-05-21 Analyses the concept of possession including specific issues such as adverse possession *Landmark Cases in Property Law* Simon Douglas, Robin Hickey, Emma Waring, 2015-06-25 *Landmark Cases in Property Law* explores the development of basic principles of property law in leading cases Each chapter considers a case on land personal property or intangibles discussing what that case contributes to the dominant themes of property jurisprudence How are property rights acquired What is the content of property rights What are the limits or boundaries of property How are property rights extinguished Individually and collectively the chapters identify a number of important themes for the doctrinal development of property institutions and their broader justification These themes include the obscure and incremental development of seemingly foundational principles the role of instrumentalism in property reasoning the influence of the law of tort on the scope of property doctrines and the impact of Roman legal reasoning on the common law of property One or more of these themes and others is revealed through careful case analysis in each chapter and they are collected and critically explored in the editors introductions This makes for a coherent and provocative collection and ensures that *Landmark Cases in Property Law* will be lively and essential reading for scholars practitioners and all those interested in the development of property principles at law
