**The African American Student's Guide to STEM Careers** Robert T. Palmer, Andrew T. Arroyo, Alonzo Flowers, 2016-12-05 This book comprehensively reviews the factors that facilitate access and success of Black students in STEM majors in higher education and it shares compelling testimonies from Black STEM professionals that will help inspire the next generation of Black scientists and engineers. Most experts agree that America's success depends on having a workforce that is highly prepared in STEM areas. Unfortunately, students of color continue to be underrepresented in higher education and specifically in completing degrees and entering careers within the STEM fields. This book supports African American students as well as all students who are interested in STEM careers, providing information on the top colleges with STEM-related programs, particularly those that best support racially diverse students, practical advice for preparing for entrance into STEM programs, and inspirational stories of successful African Americans in STEM-related careers. Authored by three educators expert in the areas of academic development of African Americans and minorities in STEM and higher education, *The African American Student's Guide to STEM Careers* focuses on preparing Black students for STEM from K-12 through graduate school. Readers will more fully appreciate the importance of STEM, recognize why more Black students need to be more actively engaged in these disciplines, and understand how to prepare Black students for success in STEM throughout the educational pipeline.

**Preparing for College and University Teaching** Joanna Gilmore, Molly Hatcher, 2023-07-03 This book is a guide for designing professional development programs for graduate students The teaching competencies framework presented here can serve as the intended curriculum for such programs The book will also be an excellent resource for evaluating programs and will be an excellent resource for academics who study graduate

students This book presents the work of the Graduate Teaching Competencies Consortium to identify organize and clarify the competencies that graduate students need to teach effectively when they join the professoriate To achieve this goal the Consortium developed a framework of 10 teaching competencies organized around three overarching questions What do graduate students need to achieve by the end of their graduate education to be successful teacher scholars What do graduate students need to understand about higher education to have successful careers as educators What do graduate students need to do to be successful teachers during their graduate student careers Although much work has been done to identify the competencies of effective teachers in higher education only a small portion of this work has been conducted with graduate student instructors This is an important area of research given that graduate students are critical in the higher education academic pipeline Nationally graduate students teach between 25% and 50% of courses offered at the undergraduate level Graduate student teaching is also critical because during early teaching experiences teachers establish a teaching style and set of teaching skills which will endure as graduate students enter the professoriate It is important to develop a teaching competency framework that is specific to graduate student instructors as they often have unique needs and roles as teachers For example graduate student instructors are in the unique position of becoming experts in their field concurrent with learning to teach Moreover as many professional development programs for graduate student instructors evolve based upon factors such as available resources and perceived needs of graduate students this framework will be a useful aid for thoughtfully designing strategic evidence based comprehensive professional development opportunities and programs
