Non-Cognitive Factors and Learning within a Business Simulation Tanja Kreitenweis, 2021-10-22 Serious games can provide a convenient and straightforward access to complex knowledge for all age groups. However, learning achievements depend largely on learners' non-cognitive factor disposition. With the aim of combining the fields of serious games and non-cognitive factors, this research focuses on the use of a business simulation which conveys change management insights. Business simulations are a subset of serious games and are perceived as a non-traditional learning method. The objectives of this work are versatile: 1. developing a scale which measures learners' knowledge and skills increase gained from a business simulation; 2. investigating the effects of non-cognitive factors on learning in this business simulation environment; and 3. exploring the moderating role of team preference in this type of learning setting. Using the newly developed scale, this work finds that learners' skills and knowledge states are more pronounced after playing the business simulation. Developing Skills for Business Leadership Gillian Watson, Stefanie Reissner, 2023-06-03 Split into the core areas of managing yourself and others, transferable management skills, and postgraduate study skills, this is an ideal textbook for CIPD advanced level students and those on non-CIPD business masters degrees. Covering the theory and practice of the key topics needed for successful professional development and practice, *Developing Skills for Business Leadership* includes content on interpersonal and communication skills, managing information and projects in both academic and professional contexts, change management, decision making, managing financial resources, and data analysis. This new edition has been fully updated throughout and now includes new material on building and managing virtual teams, remote and hybrid working arrangements, resolving conflict, organizational learning and development, as well as working across diverse cultures and how to foster inclusion. This book provides everything that students will need to manage teams in the workplace, make sound and justifiable business decisions, and effectively lead, engage, and influence others. Chapters are supported by development zones, examples, case studies, and pause for thought boxes to consolidate learning and help students with no prior business experience put the skills into context and see how they apply in the workplace. Online resources include a student guide, PowerPoint slides, lecturer manual, and downloadable templates. **The Handbook of Social Welfare Management** Rino J.
