STEM Teachers and Teaching in the Digital Era Yifat Ben-David Kolikant, Dragana Martinovic, Marina Milner-Bolotin, 2020-02-20 This book brings together researchers from Israel and Canada to discuss the challenges today s teachers and teacher educators face in their practice There is a growing expectation that the 21st century STEM teachers re examine their teaching philosophies and adjust their practices to reflect the increasing role of digital technologies This expectation presents a significant challenge to teachers who are often asked to implement novel technology rich pedagogies they did not have a chance to experience as students or become comfortable with To exacerbate this challenge the 21st century teachers function not only in a frequently changing educational reality manifested by continuous reforms but are also bombarded by often contradictory and competing demands from the legislators administrators parents and students How do we break the vicious circle of reforms and support STEM teachers in making a real change in student learning This book is unique for at least three reasons First it showcases research situated in Israel

and Canada that examines the challenges today's teachers and teacher educators face in their practice. While the governments of both countries emphasize STEM education, their approaches are different and thus provide for interesting comparisons. Second, in addition to including research-based chapters, prominent scholars discuss the contributions in each of the book sections, problematizing the issues from a global perspective. Third, technology has a potential to empower teachers in this era of change, and this book provides the unique insights from each country while allowing for comparisons, discussing solutions, and asking new questions. This book will be of interest to all involved in STEM teacher education programs or graduate programs in education as well as to educational administrators interested in implementing technology in their schools.

Unlocking the Gates Taylor Walsh, 2010-12-28 How elite universities are entering the world of online education. Over the past decade, a small revolution has taken place at some of the world's leading universities as they have started to provide free access to undergraduate course materials, including syllabi, assignments, and lectures to anyone with an Internet connection. Yale offers high-quality audio and video recordings of a careful selection of popular lectures. MIT supplies digital materials for nearly all of its courses. Carnegie Mellon boasts a purpose-built interactive learning environment, and some of the most selective universities in India have created a vast body of online content in order to reach more of the country's exploding student population. Although they don't offer online credit or degrees, efforts like these are beginning to open up elite institutions and may foreshadow significant changes in the way all universities approach teaching and learning. *Unlocking the Gates* is one of the first books to examine this important development. Drawing on a wide range of sources, including extensive interviews with university leaders, Taylor Walsh traces the evolution of these online courseware projects and considers the impact they may have both inside elite universities and beyond. As economic constraints and concerns over access demand more efficient and creative teaching models, these early initiatives may lead to more substantial innovations in how education is delivered and consumed, even at the best institutions. *Unlocking the Gates* tells an important story about this form of online learning and what it might mean for the future of higher education.

E-Pedagogy for the Digital Age Dr. P. C. Nagasubramani, Adult learners have more options for enrolling in postsecondary education than ever before and they are able to use their learning style preference in deciding which program best meets their needs For some of these students those programs are fully online and for others there is minimal use of technology As technology grows and become more integrated into individual lives the unique learning styles and preferences of adults need to learn to be incorporated into instructional design Drawing on a regional sample of US colleges 545 adult learners in a graduate programs were surveyed about how to effectively build community in their online classes Results indicated some agreement with these instructional tools Mature adult learners however were found to have stronger agreement with strategies that included work outside of the formal online class These results suggest perhaps a greater comfort for adults in working in spaces where there is less likelihood of being judged or graded and that they might value relational work with other students in different ways than younger adults
